NOTES:

- (1) For use with the 100g airbrush only
- (2) For use between the 100g airbrush and the X-Air compressors only
- (3) For use with the 100g airbrush as a pressure relief valve to prevent "Dead Head" issues. Get this valve if you intend to use this compr for many hours at a time without a break. You can also "check" the system by spraying air when ever it builds up in the compressor.

"S" indicates special shipping charge or requirement.
